Pancake/Crumpet Production

Product description

Pancakes that are made from flour, eggs, milk, sugar and baking powder are loved all over the world. A new entry model line that can produce Pancakes at a reasonable price has been launched. Corresponding to the various products, such as Crumpets, Butter milk pancakes, Scotch pancakes, Pikelets, Hot cakes and Blini's the entry model can bake pancakes starting from a minimum of 70 mm (2.8 inches) up to a maximum of 140 mm (5.7 inches). The product capacity will be up to 4,800 pieces per hour.

Pancake/Crumpet Production

The new concept is based on a line with an output of 2,400 pieces (= sandwich pancakes) / hour, with the difference that the baking part of the line is separate and this solution is primarily intended for customers who want to produce primarily single pancakes /crumpets.

Pancake/Crumpet Production

Pancake/Crumpet Production - product specification

Size	Baking time	Weight	Capacity Pieces/hour
Φ70-100mm	1:25	20-30 gram	Max 4 800
Φ100-120mm	1:25-1:40	30-50 gram	3 400 - 4 000
Φ120-140mm	1:35-1:50	40-60 gram	2 470 – 2 860

Other possible capacities of pancake/crumpet production:

Size	Capacity Pieces/hour
Φ65-95mm	1 700
Φ65-95mm	4 800
Φ65-95mm	12 000
Φ65-95mm	24 000
Φ65-70mm	28 000

Baking unit Extension by Sandwiching unit

The new concept enables the extension of the Baking unit with the production of Sandwich Pancake.

The sandwiching part, i.e. the heat stamp module, the filling and sandwiching modules are easily connectable with the baking unit when the customer wants to widen the product range with the Sandwich Pancake.
