

## Single Pancakes Production Line

*We would like to inform you that there are automatic machines for the production of single pancakes **on stock**.*

With these machines, you can produce single pancakes in the range from Ø 65mm to Ø 95mm with a maximum capacity of 4.800 pcs/hour at 85 seconds of baking time. The baking time is adjustable from 85 to 240 seconds.

In addition to this machine, you can also buy the 'Heat Stamp' module which can be installed separately and will give the option to individualize your products with a custom design, branded directly onto every single pancake.

A big advantage is that this equipment is easy to install without our engineer. We provide online support as well.

***The last two machines on stock.***
